

# Bardon helps Washington Township Schools secure funds

As your state legislator, I have worked hard to secure Build Indiana funding to benefit our schools. Build Indiana Projects are funded solely through lottery and gaming revenues.

## Greenbriar Elementary School

Greenbriar received \$25,000 in Build Indiana funds to facilitate outdoor learning. Principal Davis organized a committee to determine the use of the funds. Greenbriar has used the funds for many projects, including the following:

- Expansion of the outdoor learning center, including building a storage shed, adding additional plantings and increasing the size of the center.

- Erection of a fitness trail for both student and community use. Stations have been placed

Outdoor Learning Center.*

throughout the playground area. A path joining the stations is currently in the works.

- Development of a "Historic Trees" Program where trees are planted on the school grounds. Each tree is chosen by a class.

- Relocation of a log cabin from Northern Hamilton County. The log cabin will be placed in the back corner of the school grounds and will be available for classes, as well as community groups. The details of relocating the cabin are being ironed out now.

# Harcourt Elementary School

Harcourt is currently undergoing a massive renovation. Everything from the interior walls to the carpeting is being revamped.

Harcourt also received \$25,000 in Build Indiana funding. Preliminary plans for the funds are to develop an outdoor learning center, which will include the erection of an outdoor learning pit, a circular area where a teacher can sit in the middle and have the students gather around.
